

KDC STORE - GROUND PREPARATION

WHAT'S IN STORE?

When purchasing one of our 5-star KDC Flat Pack Portable Stores, there are a number of things to consider when preparing the area for its arrival, the type of ground you should place it on, and how it should be positioned.

Read on to find out what you should and shouldn't do to ensure a smooth and safe delivery.

5-STAR RATED

PREPARING FOR THE ARRIVAL

DO measure out the dimensions of your store in advance to find an optimal position for it. See back page for minimum ground area needed.

DON'T rush into choosing a location. Have a good think about why one area will be more suitable than another.

DO choose level and firm ground that's easily accessible for the delivery truck.

DON'T place the KDC Store directly onto loose or soft ground, as this could cause it to sink.

DO use a compacted hardcore, slabbed or concrete base to raise it off the ground.

DON'T have it placed on top of mud, or into puddles.

DO use timber railway sleepers or heavy-duty concrete slabs on top of loose, soft ground if you have to place it on this surface.

DON'T leave any debris on the ground before positioning your KDC Store.

DO position your KDC Store away from large trees to avoid leaves blocking the gutters.

DON'T choose a location in close proximity to phone or power cables that would obstruct the lifting crane.

DO think about which way the doors are going to face and if there is adequate space when they're opened.

DON'T use corner supports of varying heights to try and turn uneven ground into a level base.

STAYING SAFE

DO stand well back during the delivery and follow the driver's instructions.

DON'T try to help the driver by connecting or disconnecting chains.

DO make sure the delivery driver can see you at all times during the lifting operation.

DON'T stand in a place where the store may unexpectedly swing towards.

CUSTOMER REVIEWS

I was looking for a robust domestic tool shed that could deal with harsh weather and an exposed location, and the KDC metal storage container proved ideal for my needs. Staff were quick to answer my initial queries, and provided excellent service throughout the purchase and delivery process. Assembly was quick and straight forward and I am very happy with the finished product.

Morag McCullagh

Very helpful and pleasant service. They are quick to reply back to your emails and always happy to help. Highly recommend them!

Darren Wiseman

We were looking for a 'bike shed' to house future cycling purchases after we converted our garage for a home office. We spotted a Safetrade 247 2m x 2m storage unit being used at our local woodland project. It seemed ideal for our purposes and purchased a 2m x 3m one. It is ideal, fits 3 bikes, a foldable table tennis table, garden furniture etc just like Mary Poppin's carpet bag! It was relatively simple to construct by two people. Couldn't be more impressed.

David Williamson

If you have any questions, don't hesitate to get in touch with a member of our team. We hope you enjoy your new KDC Portable Store and would appreciate it if you could leave us a review to let others know how it has benefitted you.

The Team at Safetrade247

ADVISABLE MINIMUM PREPARED GROUND AREA:

PRODUCT CODE	AREA
